

Introducing The E50

ELECTRIC ELEVATOR

CAMBRIDGE
ELEVATING

The Most Affordable Home Elevator in North America

For homebuilders, the E50's low price and minimal construction requirements make it the elevator model of choice for larger developments. Homeowners will love its compact footprint and low energy consumption when including the E50 into a home renovation project.

50% 
Energy Savings

Achieved using smaller motor and reduced 500 lb. capacity

30% 
Faster Installation

Plug & play electrical wiring, dual-purpose aluminum guide beams and light-weight components

50% 
Freight Savings

Smart vertical crating lands any E50 model to its destination at half the cost compared to competition

Same Quality. Lower Costs.

We are more affordable in every way:

- ▲ Reduced Hoistway Costs
- ▲ 50% Energy Savings
- ▲ Compact Design
- ▲ Low Cost Shipping
- ▲ Automatic Cab Door Standard
- ▲ Fast Installations

Single Rail
Guide System

50in x 50in
Compact Footprint

Geared Counterweight
Chain Drive System

Automatic Door
Bi-Folding With Soft Opening

Smart Design Saves Material & Labor

With a compact design, the Cambridge E50 Electric Elevator has a smaller footprint.

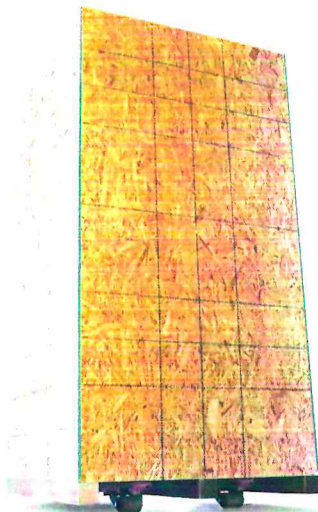

Massive cost savings for the builder. Fewer attach points makes for a faster installation.

Their hoistway

With a complex design, competitor models require more materials and labor for the builder. Many more attach points during installation.

More materials and labor for the builder. Many more attach points during installation.

50% Freight Savings

The innovative design of the elevator allows smart vertical packaging versus competitor models that are crated horizontally.

Shipping upright lands any E50 model to its destination at half the cost because freight pricing is determined by trailer space used.
